Professional Summary

Software Engineer with over 2.4 years of experience in Java application development, RESTful API design, and containerized deployments. Skilled in full-stack development using AngularJS, Spring Boot, Hibernate, and proficient in cloud platforms like Microsoft Azure.

Skills

Languages: Java, JavaScript

Framework: Spring, Spring Boot, Hibernate, AngularJS, JavaFX

Databases: MySQL, MongoDB

Tools: Git, Maven, Docker, Scene Builder

Platforms: Microsoft Azure

Project Management: Jira

Additional skills: RESTful API Development, Agile Methodologies, Object-Oriented Programming

Experience

Senior Systems Engineer, Infosys - Indore, Madhya Pradesh

Aug 2022 – Present

- Developed and maintained applications using Java, Spring Boot, and Hibernate, ensuring high performance and scalability.
- Led database design and optimization efforts with MySQL, Oracle SQL, and MongoDB, improving data retrieval speed and storage efficiency.
- Designed and implemented RESTful APIs for seamless integration between front-end (AngularJS) and back-end services, enhancing data exchange efficiency.
- Managed version control and collaboration using Git, tracked project progress with Jira, and actively participated in Agile methodologies to ensure efficient team coordination and timely project delivery.

Education

Pranveer Singh Institute of Technology, Kanpur, Bachelor of Technology (B.Tech)

Sep 2018 – July 2022

Computer Science and Engineering

- CGPA: 7.52/10

Projects

APLL EDI and TransUI App Migration

- Migrated a Struts-based Java application to Spring Boot and AngularJS, improving system performance by 40
- Created RESTful APIs and utilized Agile methodologies to ensure efficient and timely project delivery.

VR Logistics Application

- Developed a logistics application using Java, Spring Boot, and Microservices, improving efficiency by 80
- Deployed the application on Microsoft Azure, reducing operational downtime and improving scalability.

Achievements

- Achieved Infosys certifications in Java, Spring Boot, and Database, demonstrating proficiency in key technical domains.
- Successfully completed the Infosys Foundation Program - Java Spring Full Stack Developer.
- Completed the Business Communication Excellence Program.
- Solved 200+ coding problems in Python and Java on platforms like LeetCode, HackerRank, and GeeksforGeeks.
